Custom Double Sided Aluminum Buisness Card/ID Card

Handmade design template · Print area 3.38 × 2.13 in + 3.38 × 2.13 in

1 Print the template

Print the pages after this one on letter (8.5 x 11 in) paper at 100% / "Actual size" (turn off "Fit to page" or "Scale"). The 1 in box at the bottom of each page should measure exactly 1 inch. Large items are split over several sheets: lay each sheet over the gray strip of the one before it so the pink crosses line up, then tape them together from the back.

2 Make your design

Draw, paint, color or collage only inside the black outline. Fill it all the way to the line, and keep names, words and faces a little away from the edge. Bold colors (markers, paint, colored pencil pressed hard) print best; light pencil may not show. Keep it flat: no glitter, stickers or 3D pieces. This item has more than one print area (Front, Back): make a design in each outline. If they are on the same sheet, one photo of the sheet is enough; we line up each piece in its own tab.

3 Scan it or take a photo

Scan it (300 DPI is best) or take a photo from straight above in bright, even daylight with no shadows or glare. Make sure the whole black outline is in the picture.

4 Upload it to your order

After checkout, use the link in your order email, or go to My Account > Orders > View order and choose "Upload your finished design". Drag and zoom your picture until your black outline sits on the red trim line, approve the proof and submit. We print it and press it onto your item.

5 Prefer to design on a computer?

Make an image 3.38 × 2.13 in at 300 DPI (1013 × 638 pixels) and upload it the same way.

The outline on the template

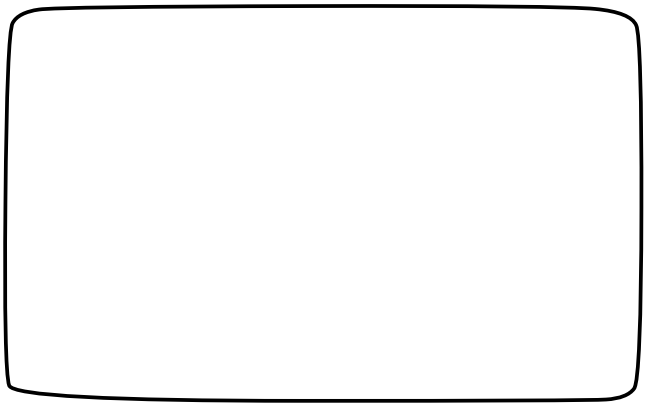

Black outline: the print area. Color only inside it.

Custom Double Sided Aluminum Buisness Card/ID Card

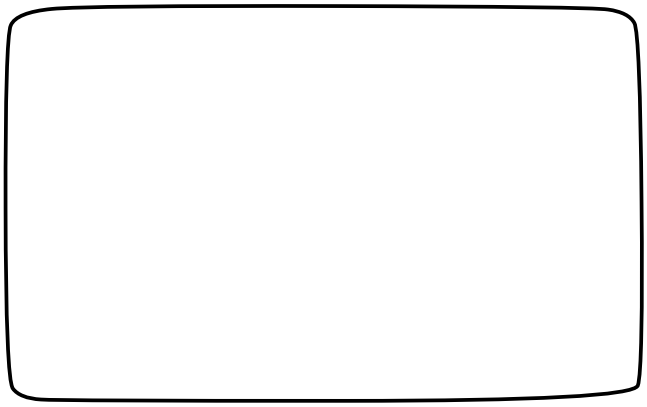

Front 3.38 × 2.13 in + Back 3.38 × 2.13 in

PRINT ON LETTER (8.5 x 11 in) PAPER AT 100% / ACTUAL SIZE - DO NOT "FIT TO PAGE"

Front · 3.38 × 2.13 in

Back · 3.38 × 2.13 in

1 in

Check: this box should measure exactly 1 inch wide.
Color only inside the black outline.
